## OBJECTIVE

It is common knowledge that sustained efforts are involved in publishing high quality research papers. Writing a scientific research paper is sometimes one of the prerequisites. It is seen that graduate and undergraduate students need to publish papers to get some financial assistance for pursuing their higher studies abroad. Unfortunately many researchers are not aware of the conventions of writing a scientific research paper.

This workshop will be of interest and use to non-native English speaking academics who will have to present and publish in English. The learning tasks are designed to help the participants develop the skills and understanding necessary for successful scientific and technical writing.
