## HIGHLIGHTS AND BENEFITS

In 2017, for the first time, the radiant city of San Diego will welcome NPs, MDs, PAs, CNMs and RNs interested in learning about the challenges and evidence-based medical interventions available to Primary Care practitioners during the 8<sup>th</sup> annual **Hot Topics in Primary Care** conference. The key topics that will be addressed during the conference include hypertension, diabetes, liver disease, dermatologic conditions, infectious disease, immunization, cancer and thyroid diseases. An active panel of experts in these areas will offer attendees a unique opportunity to engage in stimulating discussions and interprofessional activities.

Highlights of the conference include:

- ▶ A morning Preconference, “**Cardiology Update: How to Spot the Silent Killer**”, will address the most current information on heart failure, including topics such as atrial fibrillation and anticoagulation.
- ▶ An afternoon Preconference, “**Are We Forgetting Something? A Men’s Health Overview**”, will provide tips from the experts on the unique challenges and management of men’s health issues and how to enhance prevention and care awareness.
- ▶ General and Concurrent Sessions, presented in a variety of teaching styles offer thorough updates on the most pressing health care issues in Primary Care.
- ▶ The endless summer-like fun in San Diego, where historic sites, natural settings, museums, beaches and great dining can all be found in close distances.

# PRECONFERENCE SCHEDULES

WEDNESDAY, JULY 26, 2017

## PRECONFERENCE A: Cardiology Update: How to Spot the Silent Killer

Heart disease is the leading cause of death for both men and women. More than a half million people die of heart disease in the United States every year – that's 1 in every 4 deaths. With these high morbidity and mortality levels, it is vital for Primary Care practitioners to stay current with health care guidelines to properly screen, diagnosis and treat patients with heart conditions. In this Preconference, attendees will have the opportunity to enhance their knowledge on these topics to effectively develop preventive and therapeutic approaches in their practices.

### OBJECTIVES:

- ▶ Discuss the guidelines for diagnosis and treatment of heart failure.
- ▶ Define how atrial fibrillation affects patients and how Primary Care healthcare providers can appropriately guide their treatment.
- ▶ Establish safe and effective practices for lipid modification and anticoagulation therapies.

<b>7:00 A.M.</b>	<b>Preconference A Registration/Continental Breakfast</b>	
<b>8:00</b>	Diagnosis and Management of Heart Failure in Primary Care Update (Rx = .5 hr.)	Madaffari
<b>9:00</b>	Atrial Fibrillation: From Symptoms to Escalating Management Options (Rx = .25 hr.)	Ballard-Hernandez
<b>10:00</b>	<b>Refreshment Break</b>

<b>12:15 P.M.</b>	Questions and Discussion (Rx = .25 hr.)	Faculty Panel
<b>12:30</b>	<b>Adjourn</b>	

## PRECONFERENCE B: Are We Forgetting Something? A Men's Health Overview

Men are more likely to smoke, make unhealthy or risky choices and be hospitalized than women. Many of the major health risks that men face, such as cancer and heart disease, can be prevented and treated with early diagnosis through proper screening tests and routine home exams. However, men are less likely than women to do regular doctor checkups and medical care. Primary Care practitioners must be prepared to diagnose and treat the conditions that affect them and be abreast of updated guidelines in men's health care. This Preconference will provide attendees with the opportunity to expand their knowledge to take care the most prevalent conditions in the male patient population.

### OBJECTIVES:

- ▶ Examine the most prominent conditions that affect the health of men.
- ▶ Determine the best practices and approaches to treat chronic male diseases such as prostate cancer and hypogonadism.
- ▶ Evaluate the occurrence and characteristics of erectile dysfunction and its effect on men's overall well-being.

<b>12:15 P.M.</b>	<b>Preconference B Registration</b>
