

SEMICONDUCTORS

the foundation of modern technology

COMPUTING

By 2020 there will be
50 Billion
networked devices.³

HEALTHCARE

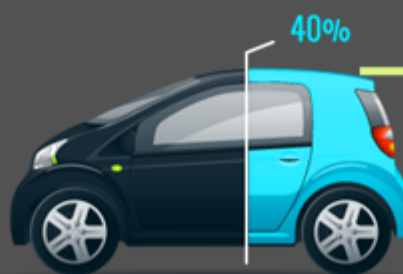

The market for
Wearable Devices
will reach \$30 Billion by 2018.¹

TELECOMMUNICATIONS

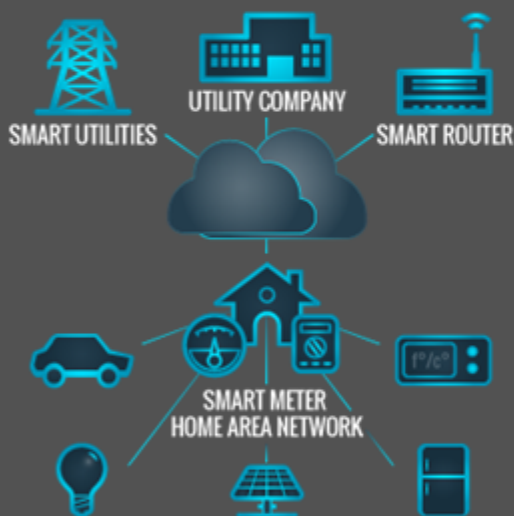

77 billion apps
expected to be downloaded by 2017
By 2020
the ratio of smart phones to people
will be 2:1

AUTOMOBILE

30-40%
of a car's value comes from the
electronics embedded in the vehicle.²

SMART ENERGY

Smart grid makes energy
consumption more efficient, reliable,
secure and green.

By 2020 the smart grid market is
expected to surpass
\$400 billion
