- Enhanced feature: Audio version of published paper
- Digital articles to share and explore
- Sharing option: Social networking enabled
- Authors, reviewers and editors are provided with scientific credits

Conference Series Conferences

- 1000 Conferences all over the World every year
- Well organized scientific program
- Renowned speakers and scientists across the globe
- Poster presentations and world class exhibits
- Panel discussions and interactive sessions
- B2B meetings
- Perfect platform for Global Networking

Key features

- Presentation by renowned speakers from all over the world
- Poster presentations and world class exhibits
- Interactive Sessions
- Platform for global networking
- Connecting scientific community

UAE history dates back to 5,500 BC, with the first known habitation of the area. Archeological evidence suggests those earliest inhabitants engaged in trade with their neighbor's – a trait that remains vital to the country's identity today. For two and a half millennia, the Gulf coast has been a crossroads of the world. From the Persian Royal Road to the Han Dynasty's Silk Road, from the trading posts of the 19th century to the hypermodernity of today's UAE, people have always converged here. They come not only to do business but also to share ideas, experience and inspiration. The Middle East has for thousands of years been a meeting point of religions, culture's and trade routes, but the newer states of the United Arab Emirates have in recent years acquired growing importance as an academic hub at the crossroads of Africa and Asia, Europe as well as of the US, with the building of a number of universities and satellite campuses. The UAE enjoys a strategic location on the new Southern Silk Road between Asia, Africa and Europe, a situation that provides optimum trading conditions and means the UAE is poised to take advantage of economic activity among the world's fastest growing and developing economies as part of the 'South-South' trade trajectory. Thousands of Chinese businesses use Dubai as a hub for Africa. Indian traders use the emirate to access the world. Latin American 'multi-Latinas' see Dubai as a launch pad into South Asia. Western multi-nationals use Dubai as a hub for the Middle East. Dubai is both a unique trans-continental trade hub and a nexus for innovation in the fields of technology, culture and the wider knowledge economy.
