Mr S Sundararajan
Corporate Trainer
RJP Infotek P Ltd

Venue
RJP Infotek Pvt Ltd
#10, First Main Road, United India Colony
Kodambakkam, Chennai – 600 024

</div>

Overview

In this Modern world of disruptive Innovation, the Cloud not only reduces cost and Administrative overhead in the IT Infrastructure space but also provides immense flexibility and scope for automation that makes ACI (Application Centric Infrastructure) a reality. Automation and management tools on the Cloud are offered at such attractive price points which were hitherto unaffordable. This also translates to reduced Life cycle management timelines coupled with higher performance efficacies. The migration / integration of a traditional Datacenter Infrastructure with Cloud no longer seems optional but an imminent compulsion. The format of integration or migration may vary on a case to case basis but irrespective of the current

size of Infrastructure - Small, Medium or Large, Cloud is the Logical step forward. It is for this very reason that IT Managers, Non IT managers, System engineers alike are expected to dwell deeper into Cloud Computing. This workshop will help you to understand the benefits and implications of Cloud w.r.t to technological features as well as TCO & RoI aspects and for sure will make a marked difference in your understanding of the subject.

Course Content

- Evolution of the Cloud
- Cloud offerings - IaaS, PaaS, SaaS
- Types of Cloud - Private (on-premises), Public (off-premises), Hybrid, InterCloud
- Understanding the Cloud Infrastructure of Microsoft Azure, AWS, and GCP
