*Melbourne, city, capital of the state of Victoria, Australia. It is located at the head of Port Phillip Bay, on the south-eastern coast. It is the core of an extensive metropolitan area the world's most southerly with a population of more than 1,000,000. In Australia it is second only to Sydney in population, and there is a good-natured rivalry between the two cities.*

*Melbourne city has many beautiful parks, and the person with an eye for architectural detail and history can find much that is varied and attractive. Melbourne has a reputation for conservatism and financial soundness attributes that have contributed to its growth and are revealed by the burgeoning skyline of the central city and the rapidly expanding eastern suburbs.*

*The expansion of Melbourne from its origins at the mouth of the Yarra River to its present shape displays a strong correlation with the geology and drainage of the land. West of the original city site, basalt flows during the Cenozoic Era filled the existing valleys and left flat, uniform plains.*
