About Amsterdam

Amsterdam is the capital and most populous municipality of the Kingdom of the Netherlands. Its status as the capital is mandated by the Constitution of the Netherlands although it is not the seat of the government and it is legacies of city's 17th-century. Amsterdam has a population of 841,186 within the city proper, 1,337,743 in the urban area and 2,431,000 in the Amsterdam metropolitan area. The city is located in the province of North Holland in the west of the country.

The metropolitan area comprises much of the northern part of the Randstad, one of the larger conurbations in Europe, with a population of approximately 7 million. Amsterdam's name derives from Amstelredamme the city's origin as a dam of the river Amstel. Originating as a small fishing village in the late 12th century, Amsterdam became one of the most important ports in the world during the Dutch Golden Age a result of its innovative developments in trade. During that time, the city was the leading centre for finance and diamonds and in the 19th and 20th centuries the city expanded, and many new neighbourhoods and suburbs were planned and built.
