.net real time project training

Course content

- **Introduction to Project**
- **SDLC**
- what is SDLC?
- why SDLC?
- **SDLC Overview**
- Requirement Gathering
- Analysys
- Designing
- Coding
- Testing
- **SDLC Methodologies**
- Waterfall Model
- V-Model
- Spiral Model
- Agile Model
- **Domain**
- what is Domain

Different Domains

- Financial
- E-Commerce
- Warehouse
- Social networking

- Services
- Security
- Networking
- Healthcare
- Education
- **SRS(Software Requirement Specifications)**
- HLD(High Level Document)
- LLD(Low Level Document)
- **Normalization**
- **Design Diagrams**
- Database Design(E-R Diagrams)
- Frontend Design(UML Diagrams)
- Flow Design(DFD's)
- **Database Casestudies**
- **Project Architecture**
- **Project Modules Explanation**
- **3-Tier Architecture and N-Tier Architecture**
- **Project Casestudies**

- **Concepts Covered in Coding**
- Html
- Javascript
- CSS
- OOPS
- Collections
- Properties
- Advanced C#.net
 - Object Initializers
 - Collection Initializers
 - Delegates and Events
 - Anonymous Methods
 - Lambda Expression
 - Extension Methods
 - IEnumerable Vs IQueryable
- MVC
 - Architecture of MVC
 - Working with Models, Views, Controllers
 - Razor Syntax
 - Html Helper Classes
 - ViewData, ViewBag, TempData, Sessions
 - Controllers, Views, Models
 - Working with Partial Views and Layouts
