

New HIPAA Privacy Officer Training: Module-2

Product Code: : AQ-9042

Speaker : Nanette Awad

Date : 25th June 2018

Time : 08:30 AM PST | 11:30 AM EST

Duration : 90Min

Description

HIPAA Privacy Officer Training will uncover all HIPAA and HITECH expectations in protecting the patient and member's right to privacy and the confidentiality of Protected Health Information (PHI) as you engage in treatment, payment, and healthcare operations (TPO) services.

HIPAA Privacy Officer Training will cover all ongoing activities of a Privacy Program related to the development, implementation, maintenance of, and adherence to the organization's policies and procedures covering the privacy of, and access to, patient health information in compliance with federal and state laws and the healthcare organization's information privacy practices.

Why Should You Attend

HIPAA requires that your organization have a Privacy Officer. Do you know if your privacy program is ready and fully compliant with the HIPAA Privacy Rule? Do you want to ensure that you are ready for the next round of federal HIPAA Audits? The fact is, privacy programs lack the complete and accurate assessment, and many do not conduct HIPAA Training.

New federal laws and regulations are raising the bar in healthcare to protect patient's rights to privacy. With the new round of government audits many practices are not prepared and face high fines and penalties.

This HIPAA Privacy Officer Training will provide a comprehensive overview of the HIPAA Privacy Officers responsibilities and an in-depth roadmap of best practices. This HIPAA Privacy Officer training will include HIPAA required privacy policies and procedures needed for compliance. You will walk away with a thorough understanding of how to administer a successful privacy program.
