From leaves to genes:
Innovations and Research
Outlook

Plant Science 2018

From leaves to genes: Accessions, Organizations & Research

Your single Destination to reach Largest Assemblage of participants from Plant Science Community

Opportunity beyond any Comparison to Attend & Network

Experience the Global Ambiance with Researchers with Similar Significance

Make New Associations and Fostering Potential Partnerships

Learning & Knowledge in a Single Package

Worldwide Acknowledgement to your Research Profile

Explore the best in Cutting Edge Research

Learn Beyond your Field of Interest

Professional Development to Elevate your Knowledge and Skills

Plant Science 2018

Speakers Representation from 50+ Countries

1 Conference | 2 Days

10 Keynote Talks | 40 Plenary Speakers | 17 Interactive sessions

Symposia | Workshops | Best Poster Award

200 Attendees | 50 Professors | and many more . . .

Greetings!

Welcome to most exciting and fascinating Paris, France!

Within this splendid setting, we plan to deliver a conference that will exceed your expectations.

During this year's Conference, we hope that you will seize the opportunity to rekindle ongoing connections and spark new ones with your colleagues from around the globe. It's with great pleasure and great honor to invite you to the "*International conference on Plant Science*" scheduled during **November 15-16, 2018** at **Paris, France**.

The Conference will be organized around the theme "*From leaves to genes*"

Plant Science 2018 anticipates more than 500 participants around the globe to experience thought provoking Keynote lectures, Oral & Poster presentations. This year conference will offer ample opportunities for all stakeholders working on Plant Science to expose their research work.

Our conference aims to gather the Researchers, principal investigators, experts, botanists and researchers working on plants from both academia and Plant Research industry, Business Delegates, Scientists and students across the globe to provide an international forum for the dissemination of original research results, new ideas and practical development experiences.

This year's Conference program, coupled with the Business Opportunity Exchange, is an event you can't afford to miss!.

Sincerely

Kristina Steven

Program Manager | Plant Science 2018

Organizing Committee

We are back again! Conference that dedicated to Innovate Solution to the Plant Field Challenges, one conference which future the shape of Plant Science. Our Conference will organize and allow to access the global researchers around the world in a single platform. Plant Science 2018 will provide a great opportunity beyond any comparison to attend and network with Plant Community.

Join us at our 2018 edition of Plant Science to Experience the Global Ambiance with the Researchers who work with similar significance of research. Plant Science 2018 will help you to get answers to all your queries related to your research work and also it creates an great opportunity to make new associations and also helps to foster potential partnerships. Plant Science 2018 will be an great platform for you to create long lasting relationship with the fellow researchers from Plant Science Community.

Get worldwide acknowledgement to your research profile where more than 55000 Visitors who analyzed our conference website to attend and submit proposals of their research work. Where this was recorded as the highest number of Visitors from both, developed and developing nations. While we penetrate the study of visitor, navigation, and traffic patterns to determine the success of our conference website majority amount of traffic we receive from cities like New York, London, Valencia, Amsterdam, Madrid, Barcelona, Athens, Sydney, Paris, Frankfurt, Tokyo, Osaka, Melbourne, Moscow and Vienna.

Plant Science 2018 website is attracting 56000+ Plant Scientists, Botanists, Research Scientists, Plant Researchers, Plant Science Organizations and Societies, Plant Science Industries, Plant Science Associations, Professors and Students.

This unique opportunity that we extend to our speakers and attendees is not being offered by any other conference organizers. Through this the abstracts and research profiles of our speakers and organizing committee members getting global visibility which is an additional feature that you would be receiving in addition to networking opportunities before, during and after the conference.

Plant Science 2018 salient features

- Meet Academia and Industry visionaries to get inspired
- Expand your knowledge and find solutions to problems
- Knowledge, Benchmarking and Networking offered at one place
- Forge connections and for global networking
- Highly Organized and Structured Scientific programs
- Poster presentations and world class exhibitions
- Participation by Stalwarts from various international societies
- Internationally renowned speakers and scientists representation
- Career guidance for early career researchers and students
- Interesting scientific deliberations and discussions
- Perfect platform for Global Networking

THURSDAY, NOVEMBER 15

08:00-09:00

Parallel Session 04-Hall 1

General Session 05-Hall 2

Parallel Session 06-Hall 3

16:00-16:30

Networking Reception and Refreshment

16:30-17:00

Awards Banquet and Closing Ceremony

Purpose

With members from around the world focused on learning about Plant Science, this is your single best opportunity to reach the largest assemblage of participants from the scientific community.

Conduct demonstrations, distribute information, meet with eminent personalities, and make a splash with latest research innovations at this outstanding event.

Goals

- The conference program emphasizes evidence-based practice, educational innovation, practical application, and peer to peer networking and collaboration.
- The goals of the conference is to provide a transformative professional development experience through
- Bringing together the world's scientific experts to catalyze and advance scientific knowledge about Plant Science to present the most recent research findings, and promote and enhance scientific collaborations around the world.
- Bringing together community leaders, scientists, and policy leaders to promote and enhance programmatic collaborations to more effectively address plant diseases and overcome barriers that limit access to care and services.

Objectives

- After participating in this meeting, attendees should be able to
- Discuss emerging issues in Plant Science
- Discuss and apply recent research findings related to Plant Science
- Disseminate the diverse voices of breakthrough innovators with visionary and practical solutions.

Who should attend?

Botanists, Plant Scientists, Plant Researchers, Crop Scientists, Soil Scientists, Research scientists, Plant Science Organizations and societies, Business delegates, CEO's and R&D Heads from Industries, Directors, Industrial Leaders, Plant Science companies, Medicinal Plants Industries, Plant Science associations & foundations, Professors and Students from Academia in the study of Plant Science and Agriculture and researchers who utilize novel techniques and knowledge in diagnosing and treating plant science diseases.

Diverse Action-Oriented Programming & Networking

EXPERIENCE: Inspiring change around the country and world, growing a revolution from the heart of Plant Science research.

EXPLORE the forefront of breakthrough ideas and models in electrifying morning keynote talks, featuring luminaries and “the greatest people you’ve never heard of.”

PARTICIPATE in afternoon panels and workshops/symposiums on diverse topics of Plant Science, Plant Nanotechnology, Agriculture and more!

NETWORK with a community of leadership – dynamic change makers from around the country and world, or from your region, to develop important professional and personal relationships.

SHARE your insights and learning at the conference in participatory and experiential workshops.

DISCOVER powerful opportunities and strategies for creating and engaging with progressive change in your work, life and community.

CELEBRATE how great a difference one person can make, and how building community amplifies that change.

Salient Features

- Robust on-line publicity for all the speakers and organizing committee members
- Career Guidance Workshops for students and early career researchers
- Accepted Abstracts will be published in various indexed journals
- Accepted abstracts will be labeled with a Digital Object Identification Number (DOI) provided by Cross Ref
- Creation of speakers and abstracts pages in Google
- Opportunity to publish full Manuscripts in our Open Access Journals

Conference Participation Inspires, Rejuvenate and Energize participants

Plant Science 2018 an unique platform to increase your reputation within the Plant Science Sector

Learning and Knowledge in a single package

Speaker's representation from 50+ Countries

1 Conference | 2 Days

The global market of the year 2018 is contestably an eminent and discreditable one for the lift off of plant science in Europe. Plants are the most vital key requisite for the food chain to be stable and sustainable. It affects the human life both in terms of agriculture and oxygen. Agriculture is envisaged to be the largest industry throughout the globe and has been gauged to increase around 62% in food demand by the year 2050.

Market Research in Europe

France(Europe) is the sixth largest agricultural producer in the world and accounts to European Union's one third of all agricultural activities within the EU.

France, Italy and Germany are leading more than half of the the EU seed and plant reproductive material market (PRM). This PRM market is the third biggest in the world. In 2012 the EU seed market in plant science reached around £7 billion. Around 20% of the global market is delineated by Europe. There are around 7000 seed companies in the EU which have been employing 50,000 people mainly from France, Netherlands, Romania, Poland, Germany and Italy.

Also, the plant based protein market globally has been expected to grow at a sinewy rate. The plant-based protein market is undergoing a remarkable growth during 2012-2017 period.

It is reckoned to grow at a value CAGR of 5.7 % throughout the period of prediction to reflect a market value of about £13.18.

Plant based proteins are looked as a salubrious alternative to already existing animal/dairy proteins. Due to this fact the global market and the European market is increasing by manifolds in plant based protein sector.

Top Biotechnology Companies In Europe

Cambridge Antibody Technology, Micro-met, Actelion, Solexa, Abcam, Genmab, Galapagos

Market Research In France

Plant Science especially agriculture plays a very prime and principal role in the growth of French economy. With a GDP of approximately \$2.42 trillion in 2016 , France is the world's sixth-largest economy and the Eu's third largest economy after Germany and UK. It has substantial agricultural resources and maintains a strong manufacturing sector.

In France, in the agricultural and vegetable seeds sector, micro-enterprises represent also more than half of the total number of seed companies (52%). However the share of medium and large enterprises is much higher than in Italy (15% and 19% respectively). Therefore, the French market is more consolidated than the Italian one.

The French food is treasured all around the globe especially in US. The value of agricultural exports have grown by 16.1% while the product quantity has raised by 4% in the ongoing present years.

In France, five companies own more than half of the seed market, which is in line with the fact that a consolidation process has taken place in this Member States. This makes France a popular hotspot in Europe to start new researches and conduct studies in the field of plant science.

The cloud-piercing, wrought-iron Eiffel Tower, broad Arc de Triomphe guarding the glamorous avenue des Champs-Élysées, gargoyled Notre Dame cathedral, lamplit bridges spanning the Seine and art nouveau cafes' wicker-chair-lined terraces are enduring Parisian emblems. Despite initial appearances, however, Paris' cityscape isn't static: there are some stunning modern and contemporary icons, too, from the inside-out, industrial-style Centre Pompidou to the mur végétal (vertical garden) gracing the Musée du Quai Branly, the glass sails of the Fondation Louis Vuitton contemporary-art centre, and the gleaming steel egg-shaped concert venue La Seine Musicale.

France's reputation for its cuisine (the French word for 'kitchen') precedes it, and whether one seeks a cosy neighbourhood bistro or a triple-Michelin-starred temple to gastronomy, one will find that every establishment prides itself on exquisite preparation and presentation of quality produce, invariably served with wine. Enticing patisseries, boulangeries (bakeries), fromageries (cheese shops) and crowded, colourful street markets are perfect for putting together a picnic to take to the city's beautiful parks and gardens. A host of culinary courses – held anywhere from home kitchens to the world's most prestigious cookery schools – offers instruction for all schedules, abilities and budgets.

Parisians are synonymous with style, and fashion shopping is the city's forte. Paris remains at the forefront of international trends, and browsing emerging and established designer boutiques and flagship haute couture houses is a quintessential part of any visit. One will also find hip concept and homewares shops, and resplendent art nouveau department stores, along with a trove of vintage shops and flea markets, atmospheric bookshops and dark-green bouquiniste stalls stocking secondhand titles lining the riverbanks, adorable children's wear and toy shops, art and antique dealers, venerable establishments selling professional cookware, and, of course, gourmet-food and wine shops galore.

With an illustrious artistic pedigree – Renoir, Rodin, Picasso, Monet, Manet, Dalí and Van Gogh are but a few of the masters who have lived and worked here over the years – Paris is one of the great art repositories of the world, harbouring treasures from antiquity onward. In addition to big hitters like the incomparable Louvre, the Musée d'Orsay's exceptional impressionist collection, and the Centre Pompidou's cache of modern and contemporary art, scores of smaller museums showcase every imaginable genre, a diverse range of venues mount major exhibitions through to offbeat installations, and there's also the city's vibrant street art.

Paris Climate:

France generally enjoys cool winters and mild summers except along the Mediterranean where mild winters and hot summers are the norm.

Average winter temperatures range from 32° F to 46° F and average summer temperatures from 61° F to 75° F. For the most warmth and sunshine go to the south of the country. Along the north and central regions, Paris has cool and fairly rainy winters, though summers here are usually hot.

Paris - A Romantically Imperial City:

Paris is a dream city for anyone with a romantic streak or an interest in history. Sightseeing opportunities are to be found in abundance. Wander along narrow, medieval alleyways or across imperial squares

Currency: Euros (€)

Transport within Paris:

Train: Dense and highly centralised, the railway network is managed by the SNCF (Société Nationale des Chemins de Fer). Coming from London, Eurostar is the most convenient means of transport. When transferring through Paris, it is important to know that your connecting train may depart from a different station. There are 5 main train stations in Paris (Gare du Nord, Gare de l'Est, Gare de Lyon, Gare d'Austerlitz and Gare Montparnasse) each of which can be easily found on the Paris Métro or RER network.

Air links: Many large cities across have an international airport: Paris of course, but also Bordeaux, Lyon, Marseille, Nice, Strasbourg, Toulouse . These cities are also well served by domestic flights. Air France, the national airline, offers several flights per day between Paris and most large cities, the average flight time being one hour. Flights between provincial cities are also possible.

Public Transport: Several cities in France (Paris of course, and also Lyon, Marseille, Toulouse, Nice, Lille, Rennes etc) have their own métro or tram system and all cities offer a rather expansive bus network.

Cycling: The city of Paris, just like many big cities in France, promotes the use of green engines and two-wheeled vehicles, as well as extending the lanes for cyclists and roller-bladers. A large-scale public bicycle sharing system is set up in several cities like Paris and Nice in France. The same system exists in Nice for cars and it will exist in the urban area of Paris (Autolib') in 2012. Vélib' (from 1.70€/day) and Autolib' in Paris. Vélos Bleus (from 1€/day)

Accompany Partners' Policy:

We respectfully remind you that partners accompanying delegates/speakers are not eligible to attend conference sessions and do not qualify for refreshments and lunches during the day unless they have registered.

Any partner wishing to attend events not previously selected and paid for in his or her registration may do so at the Conference Registration desk.

We would be pleased to accommodate any requests where possible.

Registration and Accommodation

Policy:

Registration and accommodation changes will not be accepted unless made in writing.

Changes made within 14 days of the event may incur costs due to specific hotel and venue policies

Cancellation Policy:

Registration cancellations will not be accepted unless made in writing.

Cancellations request made before 15 September 2018 will be refunded less 25% of the Conference Registration fee, to cover administration costs.

No registration refunds will be processed after this date, however, substitute delegates are welcome.
