ABOUT CONFERENCE

Welcome to the official website of 5th International Conference on Recent Trends in Computing (ICRTC-18). It is going to be held on 27th - 28th December 2018 in SRM University, NCR Campus, Ghaziabad, Delhi. ICRTC-18 is being organized by Institute For Engineering Research and Publication (IFERP). To provide an opportunity to research scholars, delegates and students to interact and share their experience and knowledge in technology application. ICRCET-18 will provide an excellent international forum for sharing knowledge and results in Recent Challenges in Engineering Technology. The aim of the Conference is to provide a platform to the researchers and practitioners from both academia as well as industry to meet the share cutting-edge development in the field.

The horizons of engineering and technology becomes increasing advantageous to the world to find a common platform where the latest information in the field could be shared. This international conference of Emerging trends in Engineering and Technology has thrown up a number of new ideas and experience. We have chosen to focus on the frontier topics in the area of Engineering deals with the separate tracks of various engineering streams. The paper here are unique. The scope of the conference is broad and covers many aspects of international technology prospectives. This conference aims to provide scholarly platform to participants to share their valuable knowledge and current information with others.

Call For Paper

Computer Science And IT (but are not limited to)

Big Data

Internet of Things

Artificial Intelligence

Privacy, security, and trust issues

Cloud Computing

Engineering Applications

Machine Learning

Circuits & Systems

Communication Systems & Signal Processing

Agent-based auction, contracting, negotiation, and e-commerce

Agent-based control and supply chain

Agent-based simulation and application integration

Cooperative and collaborative systems

Distributed intelligent systems and technologies

Human-agent interaction and experimental evaluation

Implementation, deployment, diffusion, and organizational impact

Integrating business intelligence from internal and external sources

Intelligent agent and multi-agent systems in various domains

Computers & Information Technology

E-Governance & Government

Intelligent decision support systems

Intelligent information retrieval and business intelligence

Intelligent information systems development using design science principles

Intelligent Web mining and knowledge discovery systems

Manufacturing information systems

Models, architectures and behavior models for agent-oriented information systems

Multimedia information processing

Reasoning, learning, and adaptive systems

Semantic Web, Web services, and ontologie

Best Practices & Technologies in ICT
