B2B Meetings

Tokyo, one of the 47 prefectures of Japan and has been the capital since 1869. The greater Tokyo Area is the most populous metropolitan area in the world. Tokyo has 39 million residents, 50% more people than any other urban area, with a \$2.5 trillion economy larger than that of any other city. If it were a country I would be the 8th largest economy in the world.

For Making life better for patients around the world they established an agency called Japan Agency For Medical Research and Development in April 1, 2015. It connects the most qualified practitioners, medical institutions and private-sector organizations, at home and abroad, to give clinical studies the best possible chance of succeeding. There are nearly 646 hospitals and 27,172 general clinics in Tokyo.

According to OCED statistics on health expenditure by country, the health expenditure by country, the health care market in Japan ranks 3rd in the world, following USA, China. Market growth factors include the graying population and consequent increase of homebased care, and the rise of chronic diseases coming from changes in life style. With respect to the percentage of senior citizens aged 65 years or older, Japan ranks top in the world. A notable feature is that society is aging faster than that of the western nations, with it projected that seniors will make up about 40 percent of the population by 2050.
