MARKET ANALYSIS

The worldwide Interventional Radiology market is anticipated to develop at a CAGR of approximately 5.9% amid the forecast period (2018-2023).

The worldwide Interventional Radiology market is encountering impressive development because of components like expanding inclination for minimally invasive procedures and expanding innovative headways in interventional radiology devices.

In view of procedure, the market is divided into angiography, angioplasty, embolization, thrombolysis, vertebroplasty, nephrostomy, and other procedures (biliary drainage, fallopian tube recanalization, cholecystectomy, and carotid-cavernous fistula). The angiography portion is anticipated to observe the most noteworthy offer in this market because of expanding pervasiveness of cardiovascular diseases and the developing interest for minimally invasive procedures.
