# Market Analysis

Microbiology is one of the most important branch of science that deals with the microorganisms including bacteria, virus, nematodes, algae, fungi, etc. Microbes are everywhere in the biosphere, and their presence invariably affects the environment that they are growing in. The effects of microorganisms on their environment can be beneficial or harmful or inapparent with regard to human measure or observation. Microbiologists work with these microbes and they help in the growth or degradation of microbes, finding the microbe that causes disease, analyzing the characteristics of microbes etc. This conference would be a perfect platform for all the microbiologists, microbiology students, academic people, researchers, young scholars, microbiology related companies, laboratory staffs and other people who are related to the field of microbiology to discuss the effects of microbes and the upcoming trends to eradicate the disease causing microbes, promote useful microbes and a healthy living among the society.

## Target Audience
