175th International Conference on Energy Engineering and Power Technology

February 15-16, 2019,
Chennai, India

About IOSRD

The IOSRD-International Organization of Scientific Research and Development is an independent organization to support the educationist and researchers all over the world. IOSRD is a relationship of scientists, researchers, professors, Doctors and engineers from the various fields of the science and Technology. The organization aims to organize the conferences, workshops, Research, development programs, guidance to do research work in around the world. The IOSRD publish the original research papers and review papers, surveys, case studies, technical and management reports, viewpoints, conference publications, thesis, book reviews, notes, commentaries and news in various themes of scientific research.

CONFERENCES

The goals of the conference is to provide a transformative professional Development experience through bringing together the world's scientific experts to catalyze and advance scientific knowledge about Advancements in Engineering Technology and Management.

MEMBERSHIP

IOSRD having more than 12000 professional editorial board members to support our publishing activities, register as more than 700 Life members, more than 1000 journal and conference paper publications and get benefits of 3000 researchers around the world.

JOURNALS

The IOSRD publish the original research papers, review papers and management reports, conference publications, thesis, videos, books and news in various themes of scientific research. Articles Published in our Open access Journals are Peer Reviewed & absolutely.

BOOKS

IOSRD publishes books in the various themes of Scientific Researches. Books indexed in IOSRD library will be made available to Readers across the World.It is a chance for authors to have international visitors for their research articles..

About Conference

International Conference on Energy Engineering and Power Technology will be held during February 15-16, 2019 at Chennai, India. Energy Engineering and Power Technology-2019 aims to bring together researchers, scientists, engineers, and scholar students to exchange and share their experiences, new ideas, and research results about all aspects of Electrical, Electronics and Industrial Engineering, and discuss the practical challenges encountered and the solutions adopted. The conference will be held every year to make it an ideal platform for people to share views and experiences in recent development electrical, electronics and industries related areas. We are going to provide an opportunity to exchange new ideas, advances and technologies for all registered participants. We hope that this will become a strong technological and academic community for worldwide engineers, scholars, academicians, industrialists and students in fields of relevant areas.

CALL FOR PAPER

Original research Full papers are invited from Industry Persons, Scientist, Academician, Research Scholars, P.G. & U.G. Students for presentation in our Conference and Journal Publications.

FULL PAPER (CAMERA READY COPY) FORMAT

All manuscripts must in MS-Word (.doc or .docx) format including the title, Authors name, affiliation of all authors, e-mail, abstract, keywords, Introduction with reference numbers, Works, Results, Discussions, Conclusion, Acknowledgment, and References.

Session & Tracks

CONFERENCE TRACKS

Track 1: Energy Engineering

Track 2: Alternative Energy And
The Environment

Track 3: Power Transmission and
Generation

Track 1: Energy Engineering

- Energy engineering
- Simulation and optimization of energy conversion systems
- Techniques for energy savings in the process industries
- Environmental impact and sustainability of energy systems
- Carbon capture and storage
- Renewable resources modelling and optimization
- Biorefinery supply chains
- Polygeneration energy systems
- Urban energy systems
- Energy storage systems
- Modelling and optimization of heat pumps, refrigeration and air conditioning systems
- The hydrogen economy (production, distribution and storage)
- Integrated oil and gas production
- Other energy efficient and clean technologies (combustion, etc)
- Alternative fuels
- Electric power systems

Track 2: Alternative Energy And The Environment

- Fuel Cell Technology
- Plasma Technology
- Renewable Energy Sources
- Solar Energy
- Water Energy
- Wind Energy
- Energy conservation and dissipation
- Energy conversion
- Energy efficiency
- Energy infrastructure issues
- Energy planning
- Energy policy and economics
- Energy storage devices
- Energy sustainability as related to energy and power production, distribution, and usage
- Energy systems operation
- Energy transfer
- Nuclear power issues
- Solar energy
- Sustainable development
- Thermodynamics
- Waste management and environmental issues

Track 3: Power Transmission and Generation

- Converters and Inverters
- Fault Diagnosis
- Grounding and Protection Systems
- HV Power Lines
- Network Harmonics
- Nuclear Energy
- Power Distribution
- Power Flow Analysis
- Power Quality
- Power System Design
- Power System Operation
- Power System Planning
- Power System Stability and Control
- Reliability and Security
