

Sachin Dedhia – Skynet Secure

Presents

Certificate Course

Blockchain

Date: 2nd February 2019, Timing - 9:30 am to 5:30 pm,
Venue: Ascent Biz Hotel Noida

Overview

Off-late Blockchain has become the buzzword especially after the advent of its most famous crypto-currency application Bitcoin. Nowadays more and more innovative applications are using blockchain to explore many new innovative digital financial applications and various decentralized applications that eliminate the need for 3rd party intermediaries, such as identity management, credit management, distrusted/public/shared ledger, crowd-funding, P2P insurance, smart contracts, supply chain management, online voting, medical records etc. Blockchain technology is safeguarding against hackers manipulative attacks. It is therefore essential to understand how Blockchain works and how it could be applied in business.
