About Smart Energy

Smart energy is a cost-effective and sustainable energy system in which renewable energy production, infrastructures, and consumption are integrated and coordinated through energy services, active users, and enabling technologies. Many energy companies are moving over to smart meters, which allow service providers to remotely monitor the consumer's consumption, connect, and even disconnect power. A New Energy Society will require technology such as the Smart Grid to balance energy supply and demand. Information and Communications Technology (ICT) will thus play an increasingly vital role in establishing an information and telecommunications infrastructure for the proper collection and control of data pertaining to energy components. It will also play a pivotal role in data processing technology that will enable the effective use of this information. "Smart Energy" applications needed in a smart energy based residential or light commercial environment.

Why to join ?

- Meet Experts & Infuencers Face to Face
- Networking Opportunities
- Learning In a New Space
- New Technologies
- Greater Focus
- Have Energy of Like-Minded Individuals
- Investing on Yourself & finally have Fun!

Develop Networking with.....

- Industry leaders
- Product scientists
- Development managers
- C-level executive
- Academicans
- Electrical and Environmental research departments

Meet your "Subject Matter Expert" (SME)

Subject Matter Experts will guide you in current Research & development. They help you in research queries, content, identify the objectives, and ensure your research scientifically acceptable.

Workshop/ Interactive Sessions

Workshop sessions involve extensive interaction between presenters and participants around an idea or hands-on experience of a practice. These sessions may also take the form of a crafted panel, staged conversation, dialogue or debate – all involving substantial interaction with the audience.

Round table Discussions

The right conference can be a game changer for your research and professional career. More importantly, the Round table conversation brings the experts networking and create the goldmine of opportunities.

Explore London

London is the capital and most populous city of England and the United Kingdom. Standing on the River Thames in the south east of the island of Great Britain. London is a leading global city in the arts, commerce, education, entertainment, fashion, finance, healthcare, media, professional services, research and development, tourism and transportation. It is the world's largest financial Centre and has the fifth or sixth largest metropolitan area GDP in the world. London is often regarded as a world cultural capital. It is the world's most-visited city as measured by international arrivals and has the world's largest city airport system measured by passenger traffic. It is the world's leading investment destination, hosting more international retailers and ultra-high-net-worth individuals than any other city. London's universities form the largest concentration of higher education institutes in Europe. In 2012, London became the first city to have hosted the modern Summer Olympic Games three times.
