

Your Internship journey OF Artificial Intelligence & Machine Learning

Let's see what will you be doing while having an internship on Artificial Intelligence & Machine Learning by TechTrunk Ventures this summer.

Prestart

Complementary Python Course
Get yourself extra ready before joining the session with the online complementary python FREE course by TechTrunk Ventures

Phase 2

Data Analyst
You will learn Python packages like numpy, pandas, matplotlib and seaborn, maths for Data Analyst.
Projects - 1. E commerce Customer Data Segmentation
2. Bank Churn Analytics

Phase 1

Unleashing AI & Python
You will learn the basics of AI, Machine Learning and then Get started with Python Programming basics.

Mini Project

Become a Data Geek
Form your team, get your project and identify hidden patterns and secrets from given data. Develop Report and Publish

Phase 3

Machine Learning
Learn Algorithms in Machine Learning. Linear Regression, Logistic Regression, Decision Tree, Random Forest & Artificial Neural Networks
Projects: 1. Churn Prediction
2. Energy Prediction
3. Digit Classification

Phase 4

Compete on Kaggle
Participate on a competition on kaggle. Learn Github for Software version control and collaborative development.

Phase 5

Image Processing and NLP
Learn - Image Processing Basics
Face Detection and Recognition
Sentiment Analysis, Text Classification, Chatbots
Projects: 1. Face Detection and Recognition
2. Live Social Media Sentiment Analysis
3. Sales support Chatbot

Final Project

AI Project

- Team Up, Collaborate
- Collect Data
- Develop Application
- Submit Report

Grab your Certification

Submit your project successfully to grab your certification. Upload your project on Github, Publish an article on linkedin.
