# Hong Kong

*Hong Kong has had one of the best economic records in Asia, with its GDP growing at an average of 6.5% per annum for almost 50 years. The economy has traditionally been fuelled by its natural resources, but is expanding in the sectors of science, tourism, commerce and medical tourism. It is also one of the few developing countries to heavily subsidise education and healthcare. One of Malaysia's key attractions is its extreme contrasts which further add to this theme of 'diversity'. Towering skyscrapers look down upon wooden houses built on stilts while five-star hotels sit just meters away from ancient reefs. Rugged mountains reach dramatically for the sky while their rain forest-clad slopes sweep down to floodplains teeming with forest life. Cool highland hideaways roll down to warm, theme parks, Bird parks, towers, Batu Ferringhi & Port Dickson beaches, Islands and rich, humid mangroves.*
