SUPPORTING JOURNALS

CONFERENCE SESSIONS

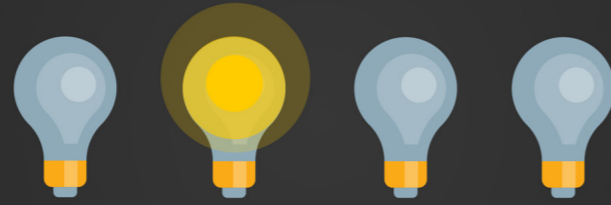

Dermatopathology is a combination of dermatology and pathology and to a lesser extent of surgical pathology that specializes in the have a look at of cutaneous sicknesses at a microscopic and molecular degree. It additionally encompasses analyses of the capacity reasons of skin diseases at a primary stage. Dermatologists are able to apprehend most skin diseases based on their appearances, anatomic distributions, and behavior. Sometimes, however, those standards do now not allow a conclusive prognosis to be made, and pores and skin biopsy is taken to be tested under the microscope or are subject to other molecular checks. That system well-known shows the histology of the sickness and effects in a selected diagnostic interpretation. In some cases, extra specialized checking out desires to be performed on biopsies, inclusive of immunofluorescence, immunohistochemistry, electron microscopy, float cytometry, and molecular-pathologic evaluation.

Abstract Submission:

DECEMBER 09-10, 2019
ABU DHABI, UAE

ABOUT VENUE

Abu Dhabi is the largest emirate and the capital of the United Arab Emirates. The Travel & Tourism Competitiveness Report 2018 by the World Economic Forum ranks it high, being the second safest destination of all 136 countries assessed with an outstanding air transport infrastructure. The Government of Abu Dhabi has identified the sustainability of healthcare funding as a key governmental policy. The languages spoken are Arabic, English, Persian, Hindi, Urdu. The Currencies is United Arab Emirates dirham. Abu Dhabi is intended to usher in a fresh era of scientific discovery in the Middle East. It is pursuing a different path: attempting to capitalize on its energy expertise to secure a more sustainable economy. At the core of this strategy is the Masdar Initiative, which will eventually house several people and 2000 businesses focused on renewable energy and sustainable technologies. Wholly owned by the Abu Dhabi Government's Mubadala Investment Company, Masdar are partners in the UAE's transition towards a knowledge-based economy and are passionate champions of sustainable development. Abu Dhabi's leaders argue that such investments are critical if they are to maintain their status in the energy sector, while reducing their long-term dependency on hydrocarbons. Masdar city is growing its neighbourhoods around the Masdar Institute of Science and Technology, a research university dedicated to cutting-edge solutions in the fields of energy and sustainability. Six leading research institutions, including Imperial College and Columbia University, are part of the Masdar Research Network. As part of its development, the emirate produced its Abu Dhabi 2030 economic vision. An integral part of the plan to achieve this vision is the establishment of advanced industries and research & development; and the associated development of a highly educated human capital to lead and grow this diversified economy.
