What is Euro Pharmacognosy 2019

Pharmacognosy is the study of drugs of natural origin.

Phytochemistry is the study of phytochemicals, which are chemicals derived from plants. Those studying phytochemistry strive to describe the structures of the large number of secondary metabolic compounds found in plants, the functions of these compounds in human and plant biology, and the biosynthesis of these compounds.

Natural products sometimes have therapeutic benefit as traditional medicines for treating diseases, yielding knowledge to derive active components as lead compounds for drug discovery.

This field has pivotal roles in biology and medicine. Through this conference specifically, we highlight the recent advances of this technology for medicine and drug delivery and discovery systems.

This conference would comprise of various sessions including: special keynote sessions, panel discussions, and poster presentations, young researcher forums, E-posters conducted by the most outstanding and renowned speakers in the field of pharmacognosy, phytochemistry and natural products.

Vision & Plan

International Market Approach

The global market for botanical and plant-derived drugs was valued at \$23.2 billion in 2013 and \$24.4 billion in 2014. This total market is expected to reach \$25.6 billion in 2015 and nearly \$35.4 billion in 2020, with a compound annual growth rate (CAGR) of 6.6% from 2015 to 2020.

The pharmaceutical and healthcare areas are expected to be some of the most active industries in the coming years with active markets in the U.S., Western Europe, North America, and China. The U.S. Pharmaceutical market is the world's most important national market. Together with Canada and Mexico, it represents the biggest continental Pharms market around the globe. The United States alone holds over 45 per cent of the global pharmaceutical market. In 2016, this share was valued around 446 billion U.S. dollars

Visitors by Country

Vision & Plan

Growth Of Thai Healthcare Market

Thailand is one of the largest medical tourism markets worldwide. Revenue increased with 194% between 2007-2013 from 1.5 billion USD to 4.7 billion USD. The percentage of population aged over 65 is currently 10% the elderly part of the population is expected to increase to 17.2% or about 17 million people in the next 10 years.

Global Market Analysis of Natural Skin and Hair care Products:

Organic skincare products dominated the global demand, and the segment generated revenue exceeding USD 3 billion in 2015. Organic hair care products are anticipated to grow at a CAGR of over 9% from 2016 to 2025. The increasing importance of natural ingredients for providing dandruff protection, hair fall control, and shining effect is expected to have a favorable impact on the industry.

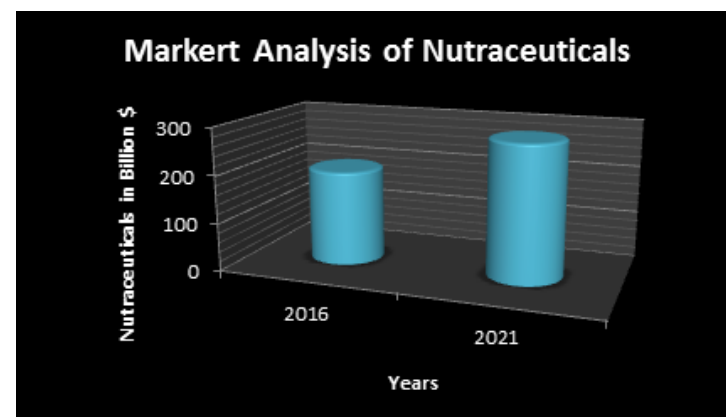

Asia-Pacific is expected to witness significant gain over the forecast period. Increasing consumption of cosmetic products in emerging economies such as China and India in light of new product launches along with rising concerns towards aging, UV effects and hair fall will fuel organic personal care industry growth.

Global Markets Analysis for Nutraceuticals

The global nutraceuticals market should reach \$285.0 billion by 2021 from \$198.7 billion in 2016 at a compound annual growth rate (CAGR) of 7.5%, from 2016 to 2021

Global Markets and Technologies for Biofuel Enzymes

The global revenue for biofuel enzymes totalled \$623.0 million in 2014, and should total \$652.1 million in 2015 and \$1.0 billion by 2020, registering a compound annual growth rate (CAGR) of 10.4%.
