Insights In Chest Disease

Host City

Amsterdam is the capital and most populous city of the Netherlands, with a population of 866,737 within the city proper, 1,380,872 in the urban area, and 2,410,960 in the metropolitan area. Amsterdam is in the province of North Holland. Amsterdam's name derives from Amstelredamme, indicative of the city's origin around a dam in the river Amstel. Originating as a small fishing village in the late 12th century, Amsterdam became one of the most important ports in the world in the Dutch Golden Age of the 17th century and became the leading centre for finance and trade. In the 19th and 20th centuries, the city expanded, and many new neighbourhoods and suburbs were planned and built.

The 17th-century canals of Amsterdam and the 19–20th century Defence Line of Amsterdam are on the UNESCO World Heritage List. Sloten, annexed in 1921 by the municipality of Amsterdam, is the oldest part of the city, dating to the 9th century. As the commercial capital of the Netherlands and one of the top financial centres in Europe, Amsterdam is considered an alpha- world city by the Globalization and World Cities (GaWC) study group. The city is also the cultural capital of the Netherlands. Many large Dutch institutions have their headquarters there, including Philips, AkzoNobel, TomTom and ING. Also, many of the world's largest companies are based in Amsterdam or established their European headquarters in the city, such as leading technology companies Uber, Netflix and Teslamaking it the highest performing regional economy of the country

Vision & Plan

International Market Approach

The global respiratory drugs market size will grow by USD 17.67 billion during 2018-2022. This industry research report provides a detailed analysis of the market based on type (asthma, chronic obstructive pulmonary disease (COPD), allergic rhinitis, cystic fibrosis, idiopathic pulmonary fibrosis, and other respiratory disorders). The increase in incidences and prevalence of respiratory disorders is driving global respiratory drugs market. Several types of respiratory diseases such as COPD, asthma, and acute respiratory infections are on the rise causing major mortality and disease burden on patients. Moreover, respiratory diseases account for more than millions of deaths in developing countries with a high number of cases reported for children. This created the need for management and treatment of respiratory diseases, which in turn, drives the respiratory drugs market.

Sponsorship and Exposure

Diamond

- Three workshop slots (audio visual included).
- Two complimentary exhibit booths with priority to purchase exhibition space and choose booth location (Booth size-3X3 sqm)
- Four complimentary registrations
- Logo recognition on congress website front page with link, sponsorship page
- One A4 color advertisement in the congress souvenir
- Three inserts provided by the sponsor in the congress delegate bags
