ABOUT VENUE

Rome, Italy's capital is a sprawling, cosmopolitan city with nearly 3,000 years of globally influential art, architecture and culture on display. Ancient ruins such as the Forum and the Colosseum evoke the power of the former Roman Empire. Vatican City, headquarters of the Roman Catholic Church, has St. Peter's Basilica and the Vatican Museums, which house masterpieces such as Michelangelo's Sistine Chapel frescoes.

Rome was founded in 753 BC by Romulus. Roman legend says that Romulus had a twin brother called Remus. As babies they were abandoned in the area which later became Rome. A she-wolf found and raised them, but when they grew up Romulus fought and killed Remus and became the first ruler of Rome.

Every night at the Trevi Fountain about 3,000 Euros are swept up from the bottom of the basin. The money is donated to Caritas, a catholic charity, which uses the money to provide services for needy families in Rome.

Rome is 4,336 m (14,453 ft.) above sea level and located inland about 27 kilometres (17 miles) from the Tyrrhenian Sea. Rome was built on the seven hills, a term coined to describe the Capitoline, Quirinal, Viminal, Esquiline, Caelian, Aventine and Palatine hills surrounding the old community. Modern Rome has 280 fountains and more than 900 churches.

The symbol SPQR, which is found all over the city of Rome, stands for "Senatus Populusque Romanus" which means, "The senate and the people of Rome".
