

The GRI Standards: Principles and Application

1 day training course on the new GRI Standards

The **Global Reporting Initiative (GRI)** is the most widely used sustainability reporting standard. This training course will prepare participants to manage their sustainability reporting process using the GRI Standards and will introduce them to all the key elements of a solid sustainability report.

First-time reporters seeking to implement the GRI Standards and those transitioning from GRI G4 to the GRI Standards, will learn how to effectively utilise the Standards and develop sustainability Reports that are technically sound, meaningful, engaging, and create value for the company and the stakeholders alike.

This training is delivered in a highly interactive manner and includes presentations, small group discussions, practicing on examples of various reports, and using disclosures to familiarise with the GRI Standards.

Training Methodology

We firmly believe that a friendly, supportive, and engaging learning environment is key to building long-lasting knowledge and maximizing retention. To support this belief, we built this course around a dynamic mixture of lectures, practical exercises, best practice case studies and group discussions.

Our method builds not only knowledge, but a confidence in discussing and applying CSR/Sustainability topics and the platform for exchanging ideas and building valuable connections. Each course closes with a post-course assignment to evaluate the level of knowledge gained through this course.

Participants will receive a certificate of attendance on successful completion of the training course.
