## AGENDA AT A GLANCE

### CONFERENCE INTRODUCTION

IoT is changing the world around us and with 'Digital India' and the 'Smart Cities Mission,' is using technologies to offer a slew of smart services that are efficient, sustainable, accessible and affordable. Smart city solutions such as smart transportation, smart infrastructure, smart energy, smart communications, smart lighting etc... According to markets, the global blockchain technology is expected to rise upto \$2.31bn by 2021. Research provides strong evidence that blockchain applications could transform existing business models and invent new forms of business in a profound way. Function using integrated technologies, such as IoT, cloud computing and artificial intelligence. These solutions reduce costs for governments, citizens and enterprises alike. Enterprise and industrial markets are poised to become the biggest areas where the Internet of Things will be implemented.

It is predicted that AI market will grow to a \$190 billion industry by 2025 and global spending on cognitive and AI systems will reach \$57.6 billion in 2021, and its forecasted that 75% of commercial enterprise apps will use AI by 2021. Worldwide spending on Blockchain solutions is expected to grow from 1.5 billion in 2018 to an estimated 11.7 billion by 2022. Around 66% of global organizations have some level of interest in blockchain, with nearly 10% currently in the experimentation or deployment stage

This summit will explore the impact of the Internet of Things (IoT), AI & Blockchain on industries, such as manufacturing, transport, supply chain, insurance, logistics, government, energy and automotive. Not merely that, we have exciting surprise activities which will help you to interact more with your peers. This will be surely an exciting event wherein you could get chance to meet big industry gems. Let's gather to shape the industry with your magnificent ideas. **7th IoT, AI & Blockchain Summit 2020 is waiting for you!!!**

### KEY THEMES DISCUSSED IN THIS CONFERENCE

- Connected Industry: How the IIoT evolves with the advent of new technology, trends, developments and some industry forecasts.
- Developing and implementing cognitive computing within industries
- Machine learning for industry - What is the role of AI and Data Analytics in it
- The future of industrial machine learning
- Understanding the implementation of IoT innovations
- How do companies ensure that the IoT's potential is realized?
- Innovation and application of AI technologies
- What is the potential of using AI for AR and VR?
- AI's future impact on cybercrime
- Changing our way of protecting our most important assets
- Transforming healthcare with AI & Big Data
- How does AI change the delivery of health care systems?
- Global technology of blockchain - Providing innovative solutions to real-world problems
- How higher levels of assurances can be instilled into decentralized applications
- Future possibilities for blockchain technology - Where will we be in 2025?
- How blockchain could create entrepreneurial value in the good manufacturing and fast consumer sectors
- Cyber security - Exploring the converging technology
- Evolving cyber intelligence landscapes
- Be part of a major networking opportunity

### WHY SHOULD YOU ATTEND?

Get more from the event, with a broader scope bringing the whole communications value chain together. Enjoy and make the best out of our dedicated networking time, meet the leading international vendors showcasing the products of tomorrow in the co-located exhibition. Expand your knowledge of the latest business models and strategies in the high-level conference.

### WHY EXHIBIT?

Make Sales  
Debut new products  
Profile your brand  
Meet new business partners  
Develop key relationships  
Educate pharma and biotech companies

### WHO YOU'LL MEET

CEOs, Presidents, VPs, Heads, CISOs, CTOs, Security Consultants, Managers, IT Professionals - Should all be present at the 7th IoT, AI & Blockchain Summit 2020. All job titles starting from the top management from the following categories:

Device Manufacturers, Sensors and Embedded Systems Companies, Systems Integrators, Enterprise Product management and development, Service Providers - Fixed, Wireless and Satellite, Developers, Content and Contact Managers, Technology, Product, Strategy, Storage, Business Analysts, Database/Data Center, Hosting, Training, System and Network Integrators, Data Center Managers, Telecoms and Tech, Compliance and Policy, Network Administrators

## AGENDA AT A GLANCE

### DAY ONE - 2nd July 2020

08:30 – Coffee and registration – An opportunity to meet and to network with your conference colleagues.

.....

09:15 Chairperson opening remarks

.....

#### MARKET OVERVIEW & ANALYSIS

09:30 – Evolving cyber intelligence landscapes

**TULIKA PANDEY**

Scientist 'F' & Director

Ministry of Electronics & Information Technology,  
Government of India

.....

10:00 – Machine learning for industry - What is the role of AI and Data Analytics in it

- The future of industrial machine learning
- Understanding the data – Making the most of predictions
- The impact of machine learning on economic performance
- Moving beyond just connecting things – Connecting, people, machines and platforms

.....

10:30 - Morning Coffee/Tea & Discussion

.....

#### CHALLENGES & OPPORTUNITIES

10:50 – DISCUSSION WITH EXPERTS: Understanding the implementation of IoT innovations

- How do companies ensure that the IoT's potential is realized?
- How solution providers ensure that their programs are appropriate for use, Taking into account that they are scalable, interoperable and have an in-built layer of security
- How effectively does the current design of software minimize the process of design-development-deployment?
- While using sensors, what are the obstacles arises and how to solve them? What role does open source software play here?
- What is the best option available for connectivity of your product?? range vs. data rate vs power consumption.

What are the drawbacks of each network?

- Given all the advantages enterprise IoT brings, what is the biggest barrier for adoption and how can this be overcome?
- How sensors can be used to identify problems / changes in process before these problems develop?
- How can bring Agility into the implementation analytics lifecycle

#### 12:10 - AI's future impact on cybercrime

- Changing our way of protecting our most important assets
- The deployment of self-learning and self-defense systems to assess business environments continuously
- Approach to identify threats that have already penetrated the network border
- Making it possible for the security team to focus on high-value activities and even to combat fast-moving, automated attackers.

#### 12:40 - Networking luncheon

#### Afternoon Chair Person

#### 13:50 - Building an AI/ML Strategy

AI and ML bring a lot of Innovation to the table and can drive some true Digital Transformation for any company. However, the technology landscape is complex and adoption is a challenge. AI projects are treated as Science experiments and are run in Isolated pockets. Machine Learning needs a lot of Data and consolidating Data becomes a daunting task. The need of the times is to take a holistic look at the adoption process. AI/ML from an Enterprise perspective is two things; Human-Machine Interaction and Knowledge. Both are connected and both drive each other's success. Intelligent Interactions will challenge knowledge, better knowledge will drive better interactions. Eventually, leading to value-creation and successful adoption.

This session will take a peak into History on how such technology disruptions have been handled in the past and how do you build a strategy that envelops the ever-evolving field of AI/ML into your company strategy.
