## Powershell Course Content

The Powershell course curriculum is structured to streamline the learning process by a team of experts. You can find the complete course details in below-mentioned modules

### [About Course](#)

PowerShell is a shell application built by Microsoft for administration tasks such as configuration management and repetitive job automation

Develop your Microsoft PowerShell skills to automate routine administrative task managing processes and operating systems, such as Windows, macOS, or Linux, through our official PowerShell training courses.

Our Microsoft authorized PowerShell training helps your employees to manage computers from the command line. Professionals will learn how to create syntactically correct PowerShell commands, run automatic scripts, bring consistency to their work, as well as construct reusable scripts and save valuable time using PowerShell, a task-based command-line shell and extensible scripting language built on .NET.

The PowerShell enterprise skill development program enables you to substantially reduce errors, track results, scale IT resources, and manage administration tasks across several platforms.
