

**Course title:** Project Management for Development Professionals Course

**Course link:** <https://upskilldevelopment.com/project-management-for-development-professionals-course>

### **Introduction**

Development organizations manage their work through projects. These projects are aimed at helping to solve problems affecting the beneficiary communities. Change in the well-being of these communities depends on the ability of development organizations to deliver project results effectively and efficiently.

This course aims to improve professionals' project management capacity within the context of the development sector. The participants will be equipped with contextualized, balanced, comprehensive, and adaptable skills to help increase the efficiency and effectiveness of projects in the development sector.

### **Who should attend**

This course targets development professionals who work in projects, individuals who are new to project management and development sector and those professionals who want to grow their careers in project management.

### **Course duration**

5 Days

### **Course Objective**

**By the end of the course you will be able to:**

- Understand project life cycle in the context of development projects
- Design an effective project focused on the needs of the beneficiaries

- Understand contextual issues in project management that are unique in development sector
- Apply different tools, techniques and processes in project management
- Direct and coordinate project team to execute a development project successfully
