Phase 2 HIPAA Audits: What to Expect and How to Pass

Date: Tuesday, November 1, 2016

Time: 10:00 AM PDT | 01:00 PM EDT

Register Now

Duration: 90 Minutes

Location: Online

Instructor: Brian Tuttle

Overview:

I will be speaking to real life audits conducted by the Federal government for Phase 2 (I've been on both sides of these audits) what your highest risks are for being fined (some of the risk factors may surprise you). It seems almost daily now I am receiving calls from nervous practice managers and compliance officers all over the USA regarding these new Phase 2 audit letters

This lesson will be addressing how practice/business managers (or compliance officers) need to get their HIPAA house in order before the imminent audits occur. It will also address major changes under the Omnibus Rule and any other applicable updates for 2016. The primary goal is to ensure everyone is well educated on what is myth and what is reality with this law, there is so much misleading information all over regarding the do's and don'ts with HIPAA - I want to add clarity for compliance officers and practice managers I will uncover myths versus reality as it relates to this very enigmatic law based on over 1000 risk assessments performed as well as years of experience in dealing directly with the Office of Civil Rights HIPAA auditors.

In addition, this course will cover the highest risk factors for being sued for wrongful disclosures of PHI and the manner in which patients are now using state laws to sue for wrongful disclosures. Don't always believe what you read online about HIPAA, especially as it relates to encryption and IT, there are a lot of groups selling more than is necessarily required.

Areas covered in the session:

- 1 Updates for 2016
- 1 Requirements of Compliance Officers
- 1 BYOD
- 1 Portable devices
- 1 Business associates and the increased burden
- 1 Emailing of PHI
- 1 Texting of PHI
- 1 Federal Audit Process
- 1 Risk Assessment
- 1 Best resources

Who Will Benefit:

- 1 Practice managers
- 1 Any business associates who work with medical practices or hospitals (i.e. billing companies, transcription companies, IT companies, answering services, home health, coders, attorneys, etc)
- 1 MD's and other medical professionals
