

Press Release

Bangalore, India, 25th October, 2016

BE Summits is proud to announce the '**Global IoT Conclave**' which is scheduled to take place on the 25th of November, 2016 in Mumbai, India at The Lalit Mumbai. This will be an intense summit filled with analyst insights and case studies aimed at understanding how India is poised to become a leading IoT market.

At the end of the year 2015 India overtook China as the fastest growing large economy in the world while it is expected to surpass Germany and Japan by 2019. As India surpasses these nations in economy it is also set to go digital as it aims to build smart cities. IOT is going to play a major role in creating a digital India comprised of self-sustaining information systems with little human intervention.

“Internet of Things” stylized **“IoT”** is the internetworking of physical devices, vehicles, buildings and other items embedded with electronics, sensors, actuators & networks that enable these objects to exchange data creating opportunities for more direct integration of the physical world into computer-based systems resulting in more efficiency, accuracy and economic benefit.

This one-day forum will host over 120 key decision makers from the Manufacturing, Transportations, Healthcare and BFSI sectors who look forward to sharing their views on the impact of IoT in their respective sectors.

IOT League have helped us in setting up a platform that is ideal for marketing and branding as well, making this a must attend for the year.

BE Summits, is a unique first-party event organizer and our team boasts of having worked with over 300 of the Fortune 500 companies across the world. We aim to inspire moments of Creativity, Optimism and Longevity while knowledge sharing is given the front row at all our forums that are hosted across the globe on a variety of topics.
